PROFILE

Full-stack web application developer with 9+ years at PV Multimedia Inc., building interactive e-learning products, financial-simulation games and internal production tools. Sole developer of three production systems in PHP, MySQL and JavaScript, with a security-minded approach (CSRF, rate limiting, hardened uploads), and comfortable turning Figma designs into fast, cross-browser interfaces. Builds modern React and TypeScript apps on Supabase in personal projects.

TECHNICAL SKILLS

Front-end	HTML5, CSS3, JavaScript (ES6+), TypeScript, React, jQuery, Bootstrap, Tailwind CSS, Chart.js
Back-end & data	PHP (MVC, PDO), MySQL, SQL, Supabase (Postgres, Row Level Security, Auth), REST API integration, WordPress
Tools	Git & GitHub, Vite, VS Code, XAMPP, FileZilla, Figma, Photoshop, Adobe Creative Suite
Practices	Responsive design, cross-browser compatibility, performance, accessibility, AI-assisted development

EXPERIENCE

Web Application Developer

June 2017 – Present

PV Multimedia Inc. · Cebu City

- **Fitforbanking game series (sole developer):** built the shared PHP/JavaScript engine and 10+ browser-based financial-simulation games on it, with a CSRF-protected, rate-limited MySQL leaderboard API, PDF certificate export and a game-master mode for instructor-led sessions.
- **PVM Project Tracker (sole developer):** designed and built a framework-free PHP MVC (PSR-4, JSON storage) that replaced scattered spreadsheets across four production workspaces, now used daily by the team to track hundreds of production entries.
- **Game Projects Manager (sole developer):** built the admin panel that ships every game and web build: ZIP deployment with automatic semantic versioning, bcrypt login with rate limiting and lockout, CSRF and upload hardening, a database manager and an audit log.
- Built interactive banking-simulation modules with dynamic graphs, balance-sheet calculations and financial reporting; integrated Chart.js dashboards.
- Led the migration of legacy Adobe Edge Animate projects to native HTML, CSS and JavaScript.
- Work with designers to turn UI/UX concepts and storyboards into responsive, production-ready interfaces; also created WordPress sites and animated 3D avatar tutors for educational content.
- Use Claude, ChatGPT and GitHub Copilot to accelerate development, debugging and refactoring.

PERSONAL PROJECTS — source and live demos on GitHub

TripSplit — shared budgets and trip expenses: fair splits, offline support, receipt scanning. React 19 · TypeScript · Supabase

MykelHub — credit, parking and inventory ledger with reports and PDF statements. React · TypeScript · Zustand

Lunelle — private cycle tracker with partner sharing and tested Row Level Security. React · TypeScript · Supabase

myKelKaraokeHub — karaoke jukebox with a QR phone remote and in-browser pitch scoring. React · Node.js · Web Audio

EDUCATION

B.S. Information Technology 2012 – 2017
Cebu Institute of Technology – University
Capstone: School Library Management System

EARLIER EXPERIENCE

Technician Intern · Channel Technologies 2016 – 17
Technician Intern · Cebu City Hall, MICS 2016
POS installation, software updates and technical support.
